

Yet another giant leap in pin welding.

EAGLE™ *Has Landed!*

If you weld pins, nails or even studs up to 1/4", EAGLE delivers the performance you should expect from a portable pin welding system! EAGLE's superior welding performance results from the *proven technology* we introduced two years ago with TALON, the lightweight system that revolutionized the industry for Cuphead pin welding.

EAGLE is perfect when Cuphead pins aren't needed and comes in a lighter, more portable

package than TALON. It's priced less too. And EAGLE continues our built-in innovations to make it the most user-friendly system available. Best of all, EAGLE can be counted on day-in and day-out, even in extreme environments. And it comes with a Full Three Year Manufacturer's Warranty to back it up! Land an EAGLE and watch production suddenly take off on your next pin welding job!

Quik-Charge Transformer

Stepless Voltage Control

Digital LED Voltage Meter

On-Board LED Diagnostics

Visible On/Off Switch

Lightweight, Easy-Grip Gun
